

CHOTA BHEEM

Rugged drone with 5 kg payload

IKSHANA

An eye in the sky

BHEEM

A heavy payload drone

Drone manufactured with highstrength carbon fibers and aerospacegrade aluminum. Drone is exclusively manufactured to carry 5 kg payload.

Drone manufactured with lightweight materials and complete airframe is foldable. Drone is equipped with 2 axis gimbal camera with 1080 PX live transmission

As the name says, Bheem is a heavy payload drone, intended to carry 20 kg payload to make the drone lightweight it is manufactured with CFRP a Aluminum.

Foldable design

20 min endurance with full payload

MTOW = 15 kg

Transmission Range = 5 km

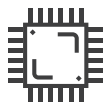

Bluetooth Enabled Secure Connection

Exclusive Ground Control Station

Payload = 5 kg

Dual CPU configuration

Foldable design

30 min endurance with full payload

MTOW = 3.5 kg

Transmission Range = 10 km

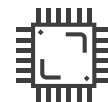

Bluetooth Enabled Secure Connection

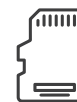

Exclusive Ground Control Station

1080 Pixel Live Transmission

32 bit Cortex Processor

Inbuilt Memory = 8 GB

Foldable design

18 min Endurance with Full Payload

MTOW = 55 kg

Transmission Range = 5 km

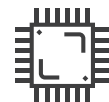

Bluetooth Enabled Secure Connection

Exclusive Ground Control Station

Payload = 20 kg

Dual CPU Configuration
